```
#include <LiquidCrystal.h>
volatile int count = 0;
int interruptPin = 2;
float speedRPM = 0;
LiquidCrystal lcd(7, 8, 9, 10, 11, 12);

void encoderPulse()
{
  count++;
}
void setup() {
  lcd.begin(16, 2);
  lcd.print("DC Motor Speed:");
  lcd.setCursor(13, 1);
  lcd.print("RPM");
  pinMode(interruptPin, INPUT_PULLUP);
  attachInterrupt(digitalPinToInterrupt(interruptPin), encoderPulse, RISING);
}
void loop() {
  lcd.setCursor(0, 1);
  count = 0;
  delay(200);
  speedRPM = count * 6.25;
  lcd.print(speedRPM);
}
```
